

DJAKPA Koffi Tepe Venougne

Lead Backend Engineer · DevSecOps · Laravel · NestJS / Node.js · Full-stack (Next.js / TypeScript)

Lomé, Togo · +228 70 29 83 24 · djakpakoffi7029@gmail.com · kof.coolify.sesachat.com · linkedin.com/in/djakpakoffi · github.com/kof70

PROFILE

Lead Backend Engineer and DevSecOps. Lead backend at alonu group: designed the alonu.shop API and migrated every group product onto a hardened self-hosted infrastructure - Coolify, Docker, CI/CD, WireGuard.

Fintech specialty: I designed the orchestration between a microfinance core-banking system (SOAP PERFECTWS) and the BCEAO PI-SPI instant-payment rails, and I integrate mobile money (PayGate, FeexPay or FedaPay depending on the product) across the products I build - the artisan platform, mobile apps, the chamber of trades, voting and ticketing. Accounting and payroll modules in the construction ERP and the ministry budget system. Also an AI agent designer (Kekeli, grounded only in official African data via BigQuery/Fivetran) and author of the Coolify MCP Server.

FLAGSHIP PROJECTS

Microfinance API - orchestrating core banking (PERFECTWS) ↔ PI-SPI (BCEAO)
NestJS backend orchestrating a microfinance core-banking system (SOAP PERFECTWS) and the BCEAO PI-SPI instant-payment rails, with reconciliation. Wallet, transfers, alias resolution, OAuth2, 31 PI-SPI endpoints, HMAC-SHA256 signed webhooks. Full end-to-end sandbox testing.

Kekeli - anti-hallucination AI agent on African data
Conversational agent (Google ADK + Gemini) answering only from verified official sources, grounded by a RAG layer: Vertex AI corpus of 1,624 indicators across 34 tables, 80+ African data sources via a Fivetran → BigQuery pipeline, 54 countries. Next.js frontend (SSE streaming chat), Firebase, Claude Opus fallback. Built for the Google Cloud Rapid Agent Hackathon (Fivetran Track).

kekeli.alonu.shop

Budget Management System - Togo Ministry of Territorial Planning
Full-stack platform (NestJS + PostgreSQL/Prisma, Next.js frontend) for the Ministry of Territorial Planning, Development and Constitutional Consolidation: budget tracking per directorate, lines and sections, disbursements, missions, official PDF/Excel documents, RBAC auth, Kanban-style treasury board. I migrated the physical archiving module from Laravel to NestJS. Live in production.

budget-ministere.coolify.alonu.shop

MikroTik Manager - full-stack network platform
Self-hosted MikroTik infrastructure management platform (routers, switches, Wi-Fi): dashboard, hardware/traffic monitoring (NetFlow), network topology, firewall, WireGuard VPN (peers, site-to-site tunnels), hotspot with PDF vouchers, 2FA, backups. Node.js/Express/TypeScript, InfluxDB, Redis, BullMQ, Docker. Designed and built by me.

techzone.africa

Coolify MCP Server - published npm package
Open-source MCP server (coolify-mcp-server-kof70) letting Claude, Cursor and Kiro operate a Coolify infrastructure (apps, databases, deployments) from an AI assistant. CI/CD, TypeScript, full API coverage.

npmjs.com/package/coolify-mcp-server-kof70 · github.com/kof70/coolify-mcp-server

Construction ERP (v3.0.0, production)
Full platform for a construction company: sites, quotes, invoices, payroll, timesheets, inventory, accounting (PDF/Excel exports), mapping (Leaflet). Next.js/React, PostgreSQL, Docker, Vitest & Playwright tests. 50+ shipped iterations.

btp.coolify.sesachat.com

Afrique Informatique - Invoicing & Accounting (Laravel)
Management application built with Laravel 12 for afriqueinformatique.net: admin dashboard, invoicing (quotes, invoices, approval workflow), accounting tracking, client/product databases. MySQL. Collaborative project.

facturel.afriqueinformatique.net

PROFESSIONAL EXPERIENCE

Lead Backend Engineer & DevSecOps
alonu group

Oct. 2025 - Present

SKILLS

- Laravel
- PHP
- NestJS
- Node.js
- TypeScript
- Next.js
- React
- React Native
- Supabase
- MySQL
- PostgreSQL
- Docker
- Coolify
- CI/CD
- WireGuard
- Git/GitHub
- Networking
- MCP
- Prisma
- Vitest
- Playwright
- InfluxDB
- Redis/BullMQ
- Claude Code
- Cursor
- Google ADK
- Gemini
- Vertex AI
- BigQuery
- Fivetran
- Firebase

EDUCATION & CERTIFICATIONS

- Recognition Award - TIDD, Robotic for Good Youth Challenge.
- Web & Mobile Developer - D-clic OIF (certification).
- ALX - software development training.
- Orange Digital School - complementary training.
- Full Stack Development - self-taught and online certifications (2021 - Present).
- Network & Telecommunications Engineering - 2020 - 2023.

PORTFOLIO

- https://kof.coolify.sesachat.com/

Lead NestJS backend: API design, backend architecture, application security, migration and deployment of every product onto a self-hosted infrastructure (Coolify, Docker, CI/CD, private WireGuard mesh). Fintech backends: SOAP core banking, BCEAO PI-SPI, mobile money (PayGate, FeexPay or FedaPay depending on the product).

Freelance Tester2024 - Present

Testerworks & GitHub

Software quality testing and validation, including MI snap Dev App (passport/ID verification reliability).

Mobile DeveloperOct. - Nov. 2025

SES, Lomé

Built SES Mobile (Supabase backend): clients, agents, locations, shifts, attendance, and notifications.

Media Production LeadJun. 2025 - Present

Rekap, Lomé

Tech/culture media production, partnerships, administration, and coordination across 20+ projects.

Semi-finalistApr. 2025

D-clic Entrepreneurship Competition, Lomé

Mayele project.

DeveloperMar. 2025

Gitpath Project, Lomé

Built and deployed Gitpath (GitHub contribution grid optimization).

Assistant Trainer, Web App DevelopmentJan. - Apr. 2025

UNIPOD Togo, Lomé

Built training materials and supported 80+ learners.

Speaker & OrganizerDec. 2024

Git & GitHub Fundamentals Event, Lomé

Event organization and technical talk.

Network TechnicianAug. 2023 - Dec. 2024

SOS Smart Group, Lomé

Network deployment/maintenance (CHU Tokoin, CHU Sylvanus Olympio, CHU University of Lomé).

Human AI AmbassadorJun. 2024 - Present

Human AI Initiative, Africa

Awareness and advocacy for practical AI supporting sustainable development.

ALL PROJECTS

- **Titan** - AI agent project initiated during the Digital Ocean Devpost hackathon.
- **Rekap** - Media initiative focused on audiovisual coverage of tech and cultural events.
- **GoldenDays B2B - API** - Design and deployment of the API for the GoldenDays B2B platform (goldendays-b2b.alonu.shop).
- **E-learning Platform - CMS & LMS API** - Development of CMS and LMS API for an e-learning platform (learning-api.coolify.alonu.shop); frontend in progress.
- **Microfinance API - orchestrating PERFECTWS ↔ PI-SPI (BCEAO)** - NestJS backend orchestrating a SOAP core-banking system (PERFECTWS) and the BCEAO PI-SPI instant-payment rails: wallet, transfers, aliases, OAuth2, 31 endpoints, HMAC-signed webhooks.
- **Chamber of Trades Backend (Togo)** (crm.alonu.shop) - NestJS platform for a Chamber of Trades: artisan directory, professional cards, certificates, training, dues, chamber/artisan finances, mobile money payments, counter sales, official PDF generation, service-to-service endpoints. 25+ modules.
- **Civil-association declaration support - MAT (Togo)** (association.coolify.alonu.shop) - Next.js application (PostgreSQL, Prisma, NextAuth) for the Ministry of Territorial Planning: commune-assigned case workers, file building and tracking, approval by a manager. Commune sync, email invitations, audit trail.
- **alonu.shop - Backend & Infrastructure (alonu group)** - Platform connecting people with verified local artisans (Togo): artisans, quotes, orders, messaging; PayGate mobile money integration for purchase and delivery, financing/microfinance. NestJS architecture, security, deployment of every product (Coolify, Docker, CI/CD, WireGuard).
- **Car Sales & Rental API** (dealautotg.com) - NestJS backend API on the VotelyTG stack, in production: mobile money payments via FedaPay.
- **VotelyTG** (votelytg.com) - Togolese event platform, live with 7,000+ users: paid voting, ticketing and registrations; organizer dashboard, configurable commissions, mobile money via FeexPay and FedaPay. Next.js.

- **Génie des Pages - Online voting platform** (geniedespages.com) - Paid online voting: candidates, jury, vote transactions, donations, sponsors. Next.js + Supabase + Prisma, mobile money (Fedapay).
- **dbla** (d-bla.com) - Multi-tenant shop platform: per-merchant storefronts (slug/subdomain), central admin back-office, Fedapay payments. Next.js + Prisma/PostgreSQL, Docker.
- **Gnonel.com** (gnonel.com) - Laravel 11 web app for public procurement.
- **Afrique Informatique - Invoicing & Accounting** (facturel.afriqueinformatique.net) - Laravel 12 app: admin dashboard, invoicing (quotes, invoices, approval) and accounting tracking. Collaborative project.
- **SES & CGSP - Security-agency management app** - Security/cleaning agency management (agents, assignments, attendance, notifications, admin), deployed for SES (sesachat.com) and CGSP (cgsp.gestion.com). Backend, security and DevOps (Coolify/Docker).
- **SES Mobile - Operations Management (Supabase)** - Mobile app for clients, agents, locations, shifts, attendance, and notifications.
- **Cheffe Citronnelle - Mobile App** - React Native app for orders, tracking, delivery and mobile money payment.
- **WOOO - Mobile App** - React Native / Expo social app (iOS & Android): profile ranking by city/country/zone from real engagement, plus admin back-office. Supabase backend.
- **VoirDrama Stremio Addon** - Node.js Stremio addon (catalog, metadata, streams).
- **biopass** - Open-source contribution: facial authentication for Linux (PAM), IR anti-spoofing. A Howdy alternative.
- **MangasOrigines reader extensions** (kof70.github.io/mangasorigines-sources) - Open-source extensions to read mangas-origines.fr on Aidoku, Paperback and Kotatsu: catalog/reader parsing, per-app install page, GitHub Pages.
- **Coolify MCP Server** - MCP server enabling AI assistants to operate Coolify.
- **Drive - Local Collaborative Workspace** - Real-time local collaborative workspace (WebSocket, multi-user).
- **Gitpath** - GitHub contribution grid design tool.
- **StartUpHub** - Open-source platform connecting startups and investors.
- **Network infrastructure - University of Lomé (UL)** - Campus network: high-density Wi-Fi for lecture halls and libraries, load balancing, QoS.
- **Network infrastructure - CHU de Kégué (Lomé)** - Kégué University Hospital network: link redundancy, medical-data hardening.
- **Network infrastructure - CHU Sylvanus Olympio (Tokoin, Lomé)** - Structured Cat6 cabling and full-site Wi-Fi coverage.
